Misuk (Suki) Seo

Game Design & Engagement · Creative Director

Portfolio ↗ Playable game ↗ @b02_apt ↗

Game designer and former brand director from South Korea, now in Berlin. For 4.5 years I ran an online fashion brand end to end — season campaigns, sales events and pop-ups — and grew its Instagram 4x, from about 20,000 to 80,000+ followers. In games, I designed reward loops and led an in-store game for Seoul select shop FFF, from concept to a two-week exhibition. I prototype my own ideas in Unity with AI tools.

LOOKING FOR Engagement & Game Design · Events & Campaigns · Community Growth

WORK EXPERIENCE

Jul 2021 – Dec 2025
Korea · 4.5 years

Brand Director — hippiedippy

Online select shop

- Ran the brand end to end, from each season's concept and mood to delivery.
- **Planned a campaign for every season and ran sales events** (Summer Sale, Black Friday, Season Off, Christmas, spring sales).
- Ran pop-ups and flea markets; proposed and led a flea market with two friends that was packed — I sold almost all the clothes I brought.
- Selected and bought the product range; styled every look.
- Designed posters and produced brand videos (Procreate, CapCut).
- **Grew Instagram from about 20,000 to 80,000+ followers (4x)** through content and social media strategy.
- Wrote all Korean copy: product descriptions and Instagram posts.
- Handled customer inquiries and orders through Cafe24 (e-commerce platform); packed and shipped orders.

Feb 2019 – Mar 2021
Seoul

Sales Associate — SNKRS Hongdae

- Sales, customer service and store management in a busy sneaker store.

May – Dec 2018
Korea

Sales Associate — Polo Ralph Lauren

- Sales and customer service for a premium fashion brand.

GAME PROJECTS

Jun – Sep 2026
Itaewon, Seoul
Team of 4
10-week build + exhibition 5–19 Sep

Lead Game Designer & Director — RRR × FFF

Retail game collaboration with select shop FFF

- Led concept, game design and creative direction: a web-based 3D mobile racing game set inside the FFF store, plus two in-store interactions (face tracking and a bubble-pop installation) that kept visitors in the store longer.
- **Designed it as FFF's Black Friday event game:** added a global leaderboard, Instagram Story sharing, personal-best tracking and an in-store prize for the #1 player. FFF reported more visitors than at the previous year's Black Friday.
- Managed the partnership with FFF, set the schedule and coordinated the 4-person team.
- Designed the level by turning the real store layout into a race track.
- Directed the art, and made the posters, storefront videos and Instagram campaign.
- Implemented gameplay features in Unity/C# with AI-assisted coding (Claude), alongside the lead programmer.
- **Ran QA throughout development:** played every build, found and fixed bugs, and organized playtests with outside players to catch issues I had missed.
- **Exhibited the game and interactions in the FFF store, 5–19 September 2026.**

Feb – May 2026
PC · Unity
Team of 5

Team Lead & Game Director — Don't Wake Up

Third-person mystery adventure (puzzle & escape) · Gameplay video ↗

- Led a 5-person team as team lead, covering game design, art and programming.
- Wrote the concept and story: a dream space just before waking, where the player faces the choice between escaping reality and a new start.
- Designed the level flow (Opening, Main Hall hub, Room 01, Room 02, Final Room), with the world growing more distorted the further it is from reality.
- Designed the item and puzzle systems: wings (double jump), boots (dash), glasses (reveal hidden objects) and a sword (break obstacles), combined across three puzzles.
- Designed and built *Falling Dream* on my own, a falling mini-game with a Wake Gauge that unlocks the sword: wrote the full design document and made the playable prototype in Unity.
- **FFF liked the game so much that it was also displayed for visitors to play during the RRR × FFF exhibition.**

EDUCATION & TRAINING

Dec 2025 – Aug 2026
Korea

Game Development Program (Unity & C#) — Advanced K-Game Academy, MBC Academy

- 8-month, full-time, government-funded program organized by NEOWIZ.
- **Selected as an outstanding scholarship student.**
- Built 15+ Unity prototypes: 2D/3D action, FPS, ML-Agents (AI training), URP Shader Graph, and a login server (MariaDB/PHP).

2016 – 2021
Korea

B.A. Fashion Industry — Incheon National University

SKILLS & LANGUAGES

Game design	Design documents, core loops, systems and progression, gameplay flow, playtesting
Testing	Playtests with outside players, bug finding, turning feedback into fixes
Tools	Unity, C# (basic), AI-assisted prototyping (Claude), Git/GitHub, Blender (basic), Nomad Sculpt
Visual & content	Procreate, CapCut, photography and video, social media content
Languages	**Korean** — native · **English** — studying for B1 · **Japanese** — basic
